Plant bamboo

Bamboo is the fastest growing plant in the world, it grows 30% faster than any tree, there are even species that can grow up to one meter per day!
As it belongs to the same family as grass, bamboo does not need to be replanted, it is cut and continues to grow.
In addition, in its natural state it does not require pesticides, since it naturally rejects fungi and bacteria.
Therefore, it requires minimal intervention from polluting agricultural machinery. Bamboo does not need additional irrigation, rain is enough!
As if this were not enough, its roots prevent soil erosion by removing excess nitrogen. And it is 100% biodegradable.

El bambú es la planta de crecimiento más rápido del mundo, crece un 30% más rápido que cualquier árbol, incluso hay especies que pueden crecer hasta un metro por día!
Como pertenece a la misma familia del pasto, el bambú no necesita ser replantado, se corta y sigue creciendo.
Además, en estado natural no requiere pesticidas, ya que rechaza naturalmente hongos y bacterias.
Por lo mismo, requiere de una mínima intervención de la contaminante maquinaria agrícola. El bambú no necesita de riego adicional, basta con la lluvia!
Como si esto fuera poco, sus raíces evitan la erosión de los suelos, removiendo el exceso de nitrógeno. Y es 100% biodegradable.

RABS

RECYCLING LOVE

RABS (recycled ABS) is a recycled and highly recyclable plastic, highly resistant, suitable for a multitude of applications. The reuse of this material, coming from various pre- and post-consumer collection sources, makes it an eco-friendly solution for industries and consumption, without diminishing the high qualities that define it.

El RABS (ABS reciclado), es un plástico reciclado y altamente reciclable, de gran resistencia, apto para multitud de aplicaciones. La reutilización de este material, procedente de diversas fuentes de recolección pre y post-consumer, lo convierte en una solución eco-friendly de las industrias y el consumo, sin mermar las altas cualidades que lo definen.

RECYCLING LOVE

RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

Recycled Cardboard &WHEAT STRAW

The remains of paper from the manufacturing processes, together with the paper that has reached the end of its lifespan, become an ecological and sustainable material. During the paper recycling process, the amount of virgin fibres used is drastically reduced, contributing to the conservation of forests. In addition, the amount of energy used in the process of recycled paper is considerably reduced, compared to the energy required for the production of traditional white paper.

Los restos de papel de los procesos de fabricación, junto al papel que ha llegado al final de su vida útil, se convierten en un lienzo ecológico y sostenible. Durante el proceso de reciclado del papel, la cantidad de fibras vírgenes utilizada se reduce drásticamente, contribuyendo así a la conservación de los bosques. Por otra parte, la cantidad de energía utilizada en el proceso de fabricación del papel reciclado se reduce considerablemente, en comparación con la energía necesaria para la elaboración del papel blanco tradicional.

Natural CORK

Cork is a material with unique innate characteristics: resistant and light, thermal and acoustic insulation, impermeable to liquids, elastic and compressible, fireproof and hypoallergenic.

But above all, cork is a 100% natural, renewable and biodegradable material. All this makes cork an incomparable material.

.

El corcho es un material con unas características innatas únicas: resistente y ligero, aislante térmico y acústico, impermeable a líquidos, elástico y compresible, ignífugo e hipoalergénico.

Pero sobre todo, el corcho es un material 100% natural, renovable y biodegradable. Todo ello hace del corcho un material inigualable.

Bamboo Charger

Bamboo is the fastest growing plant in the world, it grows 30% faster than any tree, there are even species that can grow up to one meter per day!
As it belongs to the same family as grass, bamboo does not need to be replanted, it is cut and continues to grow.
In addition, in its natural state it does not require pesticides, since it naturally rejects fungi and bacteria.
Therefore, it requires minimal intervention from polluting agricultural machinery. Bamboo does not need additional irrigation, rain is enough!
As if this were not enough, its roots prevent soil erosion by removing excess nitrogen. And it is 100% biodegradable.

El bambú es la planta de crecimiento más rápido del mundo, crece un 30% más rápido que cualquier árbol, incluso hay especies que pueden crecer hasta un metro por día!
Como pertenece a la misma familia del pasto, el bambú no necesita ser replantado, se corta y sigue creciendo.
Además, en estado natural no requiere pesticidas, ya que rechaza naturalmente hongos y bacterias.
Por lo mismo, requiere de una mínima intervención de la contaminante maquinaria agrícola. El bambú no necesita de riego adicional, basta con la lluvia!
Como si esto fuera poco, sus raíces evitan la erosión de los suelos, removiendo el exceso de nitrógeno. Y es 100% biodegradable.

Rpet

= = ZERO WASTE

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

This notepad, made from stone extracts, has followed an ecological and environmentally friendly manufacturing process, using no water, cellulose, chlorine or strong acids, likely to generate toxic emissions.

This paper used is made of calcium carbonate (80%) and non-toxic resins (20% HDPE), creating a kind of paper not derived from traditional tree sources. It´s texture is smooth, it is durable, washable and 100% waterproof, making it an excellent high quality and environmentally friendly alternative to traditional paper.

.

Este bloc de notas, fabricado a base de extractos de piedra, ha seguido un proceso de fabricación ecológico y respetuoso con el medio ambiente, no empleando agua, celulosa, cloro, ni ácidos fuertes que puedan emitir gases tóxicos.

El papel usado en el mismo está compuesto de carbonato cálcico (80%) y de resinas no-tóxicas (20% HDPE), creando, por tanto, un papel cuyo origen no es el tradicional proveniente de los árboles. Su textura suave, de alta resistencia, lavable y, 100% impermeable, le confiere una excelente calidad alternativa y ecológica sobre el papel tradicional.

SEED PAPER

write. plant. grow.

The paper used for the covers of these notepads is recyclable and degradable, made from petunia seeds, turning it into planting paper.

El papel de las cubiertas de estos blocs es un papel reciclable y degradable, en cuya elaboración se incluyen semillas de petunia, convirtiéndolo así en papel plantable.

When my lifespan is over, **plant me!**

ISO 22196 CERTIFIED ANTIBACTERIAL

Antibacterial material specially processed to inhibit and prevent bacterial growth, due to the incorporation of permanent static microbial agents, which are highly effective in the control against bacterial contamination.

Material antibacteriano, especialmente procesado para inhibir y prevenir las cargas bacterianas, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad contra la contaminación bacteriana.

SPECIAL
LASER ENGRAVING
MATCHING COLOUR

These notebooks with colour interior have an outer coating specially designed for laser engraving, which will ensure that your advertising or brand is perfectly engraved in the same colour as the inside of your chosen notebook or pen.

Estos bloc de notas con interior en color tiene un recubrimiento exterior especialmente diseñado para grabado láser, con el que conseguirá que su publicidad o marca quede perfectamente grabada en el mismo color que el interior de su bloc o boligrafo elegido.

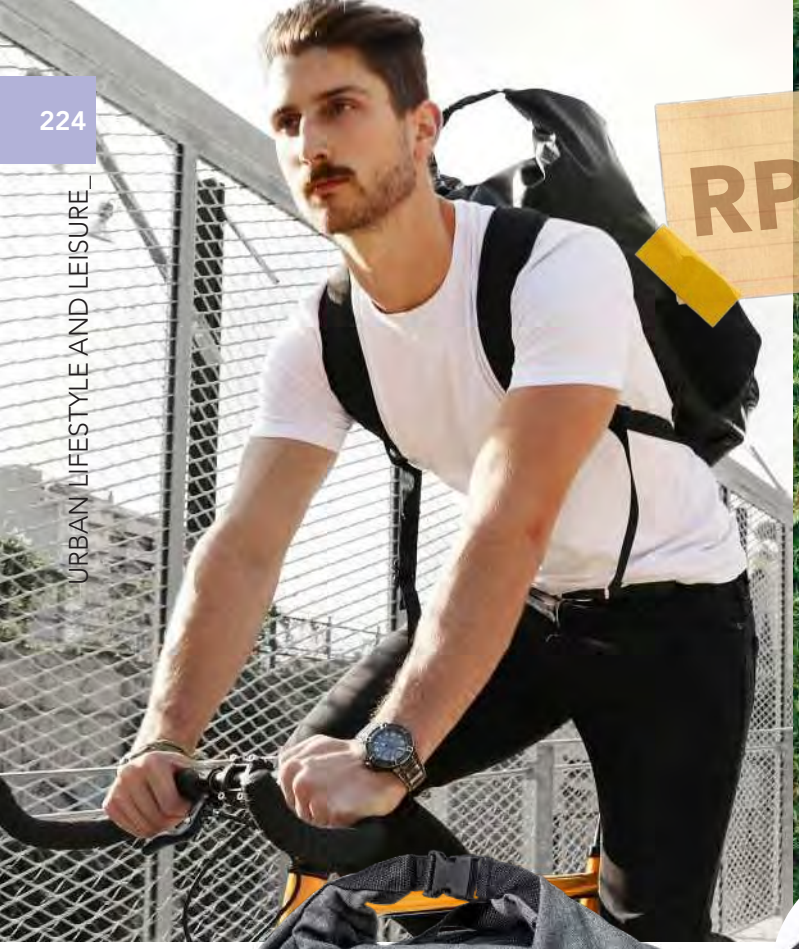
Urban, design, quality



RPET

100% recycled and recyclable material

.

Material de origen 100% reciclado y reciclable

HELPI

ZERO WASTE

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

= = ZERO WASTE

With the reuse of 12 PET drinks bottles a backpack can be manufactured.

Con la reutilización de 12 botellas PET para bebidas se puede fabricar una mochila.

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

REFLECTIVE FILAMENTS

Items made using reflective filaments, with a high capacity to reflect light intensely. Filament with millions of reflective pigments, based on the principle of retro-reflection of light, a property of night visibility that consists in light returning back to the source of origin, regardless of the angle of the source.

Artículos fabricados con filamentos reflectantes, con gran capacidad para reflejar intensamente la luz. Filamento con millones de pigmentos reflectantes, basado en el principio de la retro-reflexión de la luz, una propiedad de visibilidad nocturna que consiste en la devolución de la luz hacia la fuente de origen, sin importar el ángulo de dicha fuente.

Material de origen 100% reciclado y reciclable

RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RECYCLED COTTON

Cotton waste from manufacturing processes, together with that from products that have reached the end of their lifespan, takes on a new life. A question arises: Does cotton recovery result in a quality fabric? The answer is YES, preserving natural resources and reducing the amount of waste generated. In addition, regenerated cotton keeps the properties of soft touch.

Los restos de algodón de los procesos de fabricación, junto con los de productos que han llegado al final de su vida útil, cobran una nueva vida. Surge una pregunta: ¿el resultado de la recuperación del algodón da como resultado un tejido de calidad? La respuesta es SÍ, conservando recursos naturales y reduciendo la cantidad de residuos generados. Además, el algodón regenerado mantiene las propiedades de suavidad al tacto.

RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

ANTIBACTERIAL FORMULA

Antibacterial material specially processed to inhibit and prevent bacterial growth, due to the incorporation of permanent static microbial agents, which are highly effective in the control against bacterial contamination.

Material antibacteriano, especialmente procesado para inhibir y prevenir las cargas bacterianas, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad contra la contaminación bacteriana.

100% COMPOSTABLE
BIODEGRADABLE

PLA

USE ME,
I AM ECO-FRIENDLY

This product is manufactured with PLA material, from renewable raw materials, with important qualities such as versatility and strength, but prevailing all, it is compostable.

Este producto está fabricado con material PLA, procedente de materias primas renovables, con importantes propiedades como la versatilidad y la resistencia pero prevaleciendo entre ellas la de compostabilidad.

Rpet

The fabric used in the manufacturing process of these bottles is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos bidones está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

100% recycled and recyclable material

LunchBox Glass

Eco-friendly, reusable lunchboxes: due to their light weight, durability and food safety qualities, borosilicate lunchboxes offer a sustainable alternative to traditional, plastic lunchboxes.

Fiambreras ecológicas reutilizables: por su ligereza, alta resistencia y seguridad alimentaria, las fiambreras de borosilicato constituyen una alternativa sostenible a las de plástico.

ANTIBACTERIAL FORMULA

ANTIBACTERIAL FORMULA

Antibacterial material specially processed to inhibit and prevent bacterial growth, due to the incorporation of permanent static microbial agents, which are highly effective in the control against bacterial contamination.

Material antibacteriano, especialmente procesado para inhibir y prevenir las cargas bacterianas, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad contra la contaminación bacteriana.

HELP!

ZERO WASTE

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

MADE WITH LOVE

Clay:

From the mixture of 100% natural elements such as water, sand and clay, mud is obtained, being a valuable mixture used in the pottery industry. Both its natural origin and its artisanal transformation processes turn it into one of the most sustainable options in this industry, as well as being highly recyclable, having its waste having a very low impact on the environment.

.

Barro:

De la mezcla de elementos 100% naturales como el agua, la arena y la arcilla, se obtiene el barro, una valiosa mezcla utilizada en la industria de la alfarería. Tanto por su origen natural como por sus procesos de transformación artesanales, lo convierten en una de las opciones más sostenibles de esta industria, además de ser altamente reciclable y cuyos residuos tienen muy bajo impacto en el medio ambiente.

Global Recycled Standard

Recycled glass means a better and lesser use of resources and raw materials, turning it into an optimal option for the manufacture of new products with a multitude of material qualities. From its collection of articles, we get alternative ideas that contribute to the reduction of waste into the environment, saving at the same time raw materials and energy in its manufacturing process.

El vidrio reciclado supone un mejor y menor uso de recursos y materias primas que lo convierten en una óptima opción para la fabricación de nuevos productos con multitud de cualidades materiales. De su colección de artículos, conseguimos ideas alternativas que contribuyen a la reducción de residuos que llegan al medio y ahorra materias primas y energía en su fabricación.

RECYCLED COTTON

Global Recycled Standard

Cotton waste from manufacturing processes, together with that from products that have reached the end of their lifespan, takes on a new life. A question arises: Does cotton recovery result in a quality fabric? The answer is YES, preserving natural resources and reducing the amount of waste generated. In addition, regenerated cotton keeps the properties of soft touch.

Los restos de algodón de los procesos de fabricación, junto con los de productos que han llegado al final de su vida útil, cobran una nueva vida. Surge una pregunta: ¿el resultado de la recuperación del algodón da como resultado un tejido de calidad? La respuesta es SÍ, conservando recursos naturales y reduciendo la cantidad de residuos generados. Además, el algodón regenerado mantiene las propiedades de suavidad al tacto.

RPET

100% recycled and recyclable material

Material de origen 100% reciclado y reciclable

HELP!

ZERO WASTE

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

From the the use of pre- and post-consumer waste from nylon.
.
Resultado de la utilización de los desechos pre y post-consumer del nailon.

Rpet

The fabric used in the manufacturing process of this item is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

Dalla miscela di elementi 100% naturali come acqua, sabbia e terra, si ottiene l'argilla, una preziosa miscela utilizzata nell'industria della ceramica. Sia per la sua origine naturale che per i suoi processi di trasformazione artigianale, viene considerata una delle opzioni più sostenibili in questo settore, oltre ad essere altamente riciclabile e con rifiuti a bassissimo impatto sull'ambiente.

.

From the mixture of 100% natural elements such as water, sand and clay, mud is obtained, being a valuable mixture used in the pottery industry. Both its natural origin and its artisanal transformation processes turn it into one of the most sustainable options in this industry, as well as being highly recyclable, having its waste having a very low impact on the environment.

Dai rispettosi processi di potatura e pulizia dell'albero di cocco, e dopo il consumo del suo frutto, della noce di cocco e della sua pianta, si possono ottenere una moltitudine di prodotti che, opportunamente lavorati, diventano parte della nostra collezione di articoli eco-compatibili per il contributo alla sostenibilità del pianeta

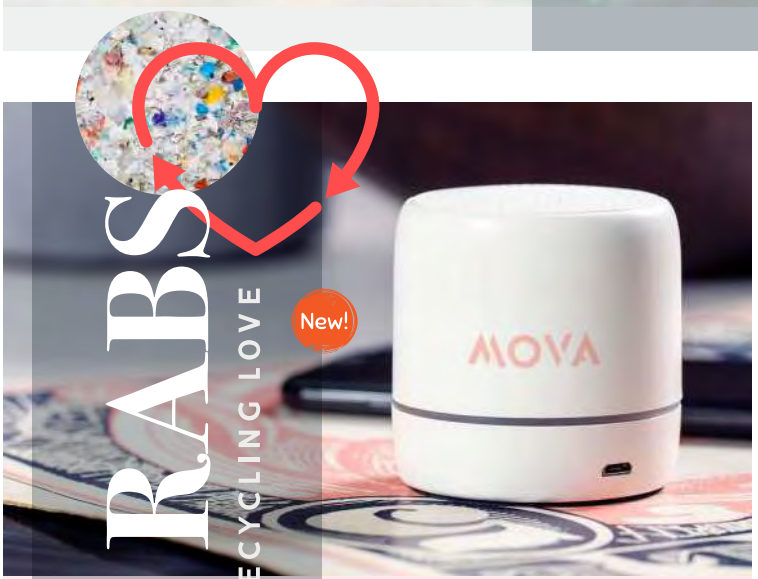
.

From the respectful processes of pruning and cleaning the coconut tree, and after the consumption of its fruit, a multitude of products can be obtained from the coconut and its plant which, properly processed, join our collection of eco-friendly products for the contribution to the sustainability of the planet.

Il vetro è un materiale ceramico inorganico, ottenuto attraverso l'uso di sabbia, sodio e calcare, oltre che altamente riciclabile.
Il vetro riciclato significa un uso migliore e minore delle risorse e delle materie prime che lo rendono un'opzione ottimale per la produzione di nuovi prodotti con una moltitudine di qualità materiali. Dalla loro raccolta di articoli, otteniamo idee alternative che contribuiscono alla riduzione degli sprechi che raggiungono l'ambiente e risparmiano materie prime ed energia nella loro fabbricazione.

.

Glass is an inorganic, ceramic material, obtained through the use of sand, sodium and limestone, as well as highly recyclable.
Recycled glass means a better and lesser use of resources and raw materials, turning it into an optimal option for the manufacture of new products with a multitude of material qualities. From its collection of articles, we get alternative ideas that contribute to the reduction of waste into the environment, saving at the same time raw materials and energy in its manufacturing process.



Il RABS (ABS riciclato), è una plastica riciclata e altamente riciclabile, di grande resistenza e con una moltitudine di applicazioni e qualità materiali per la fabbricazione di un prodotto.
Il riutilizzo di questo materiale, proveniente da varie fonti di raccolta pre e post consumo, lo rende una soluzione eco-compatibile per le industrie e i consumi.

.

RABS (Recycled ABS), is a recycled and highly recyclable plastic, highly resistant and with a wide range of applications and material qualities for the manufacturing of a product.
The reuse of this material, coming from various pre- and post-consumer collection sources, makes it an eco-friendly solution for industries and consumption.

Il PLA (acido polilattico) è prodotto al 100% da risorse naturali come amido di mais, manioca o canna da zucchero, essendo degradabile e, nei nostri prodotti, diventa compostabile al 100% alla fine del suo ciclo shelf life, senza generazione di rifiuti tossici. Inoltre, la sua versatilità e le diverse trame consentono lo sviluppo di vari articoli, dalle borse ai tamburi, riducendo notevolmente l'utilizzo di energia durante il suo processo di fabbricazione.

.

PLA (Polylactic Acid) is manufactured from 100% natural resources such as corn starch, yucca or sugar cane, being degradable and in our products, it becomes 100% compostable at the end of its lifespan, avoiding the generation of toxic waste. In addition, its versatility and different textures makes it a suitable compound for the elaboration of diverse articles, from bags to bottles, reducing considerably the use of energy during its manufacturing process.

Feltro PET riciclato, tessuto non tessuto in versione moderna. Il risultato della combinazione del processo di riciclaggio delle materie plastiche, insieme alla tecnica millenaria di fabbricazione del feltro, si traduce in un materiale eco-trend che, oltre ad essere di origine riciclata, è anche riciclabile.

.

Recycled PET felt, non-woven textile in a contemporary style. The result of the combination of the recycling process of plastic materials, together with the millenary technique of manufacturing felt, results in an eco-trend material that, in addition to being of recycled origin, is also recyclable.

Come risultato dell'utilizzo di scarti pre e post consumo di nylon, fibra tessile sintetica elastica e molto resistente, si ottiene questo nuovo materiale, dove le proprietà di resistenza meccanica, durezza e buona tenacia vanno di pari passo con il concetto sostenibile, rispettando i principi della 3R (ridurre, riutilizzare, riciclare).

.

From the the use of pre- and post-consumer waste from nylon -an elastic and very resistant synthetic textile fibre- this new material is obtained, where the properties of mechanical resistance, strength and durability go hand in hand with the sustainable concept, complying with the principles of the 3Rs (Reduce, Reuse, Recycle).

Il rPET o PET riciclato è un materiale ricavato dal riutilizzo del PET, una plastica utilizzata, in particolare nella produzione di bottiglie e altri contenitori per bevande. Attraverso i processi industriali, i rifiuti di PET vengono riciclati al 100%, con conseguente rPET, la cui impronta di carbonio (emissioni di CO2 nell'atmosfera) viene drasticamente ridotta. In questo modo, una semplice bottiglia di plastica diventa un materiale resistente con molte applicazioni e funzionalità. Ci troviamo quindi di fronte a un composto di origine riciclata e, a sua volta, riciclabile.

.

RPET or recycled PET is a material made from the reuse of PET, a kind of plastic present, mainly in the manufacture of bottles and other packaging for drinks. Through industrial processes, PET waste is 100% recycled, resulting in rPET, whose carbon footprint (CO2 emissions into the atmosphere) is drastically reduced. In this way, a simple plastic bottle becomes a resistant material with a multitude of applications and functionalities. This is, at the same time, a recycled and recyclable compound.

I resti di cotone dei processi produttivi, insieme a quelli dei prodotti che hanno raggiunto la fine della loro vita utile, assumono una nuova vita. Sorge una domanda: il risultato del recupero del cotone si traduce in tessuto di qualità, La risposta è SÌ, preservando le risorse naturali e riducendo la quantità di rifiuti generati. Inoltre, il cotone rigenerato mantiene le proprietà di morbidezza al tatto.

.

Cotton waste from manufacturing processes, together with that from products that have reached the end of their lifespan, takes on a new life. A question arises: Does cotton recovery result in a quality fabric? The answer is YES, preserving natural resources and reducing the amount of waste generated. In addition, regenerated cotton keeps the properties of soft touch.

Il cotone organico, il cotone dei nostri antenati, coltivato con metodi sostenibili a basso impatto ambientale. Il non utilizzo di insetticidi, fertilizzanti o altri prodotti chimici nel processo di filatura e produzione produce un tessuto confortevole, derivato al 100% da piante e ipoallergenico, in un tono naturale che rivendica l'agricoltura tradizionale.

.

Organic cotton, the cotton of our ancestors, grown using sustainable methods with low impact on the environment. The non-use of insecticides, fertilizers or other chemicals in the yarn and production processes results in a comfortable fabric, 100% plant-derived and hypoallergenic, in a natural weave that claims traditional agriculture.

La fibra di canapa, ottenuta dalla pianta di Cannabis, ha tra le sue principali destinazioni l'industria tessile, essendo un tessuto leggero e molto resistente. Sia il processo di coltivazione della pianta che il processo di ottenimento delle fibre di canapa sono sistemi ecologici, rendendolo un tessuto di origine naturale e sostenibile, utilizzato anticamente per le sue importanti qualità, oggi è un grande rivale delle fibre sintetiche.

.

Hemp fibre, obtained from the Cannabis plant, has among its main destinations the textile industry, as it is a light and highly resistant fabric. Both the growing process of the plant and the process of obtaining hemp fibres are environmentally friendly systems, making of it a fabric of natural and sustainable origin, used ancestrally given its important qualities, being today a great competitor to synthetic fibres.

La iuta naturale occupa un posto di rilievo tra i materiali sostenibili perché i processi utilizzati per la sua produzione hanno un basso impatto sull'ambiente, insieme alla sua rapida rigenerazione. L'aspetto naturale insieme alla sua resistenza e durata lo rendono un materiale di riferimento sostenibile.

.

Natural jute stands out among sustainable materials because the manufacturing processes have a low impact on the environment, together with its rapid regeneration. The natural aspect, together with its resistance and durability, makes of it a sustainable material of reference.

Recycled Cardboard

La carta rimane dei processi produttivi, insieme alla carta che ha raggiunto la fine della sua vita utile, diventa una tela ecologica e sostenibile. Durante il processo di riciclaggio della carta, la quantità di fibre vergini utilizzate viene drasticamente ridotta, contribuendo così alla conservazione delle foreste. D'altra parte, la quantità di energia utilizzata nel processo di fabbricazione della carta riciclata è notevolmente ridotta, rispetto all'energia necessaria per produrre carta bianca tradizionale.

.

The remains of paper from the manufacturing processes, together with the paper that has reached the end of its lifespan, become an ecological and sustainable material. During the paper recycling process, the amount of virgin fibres used is drastically reduced, contributing to the conservation of forests. In addition, the amount of energy used in the process of recycled paper is considerably reduced, compared to the energy required for the production of traditional white paper.

Carta riciclabile e degradabile, la cui produzione include semi di petunia, rendendola una carta piantabile.

.

Recyclable and degradable paper, which is made from petunia seeds, resulting in a plantable paper.

Materiale estratto dalla pietra naturale, che conserva alcune proprietà come la durata e la conservazione.

.

Material extracted from natural stone, which preserves several properties such as durability and preservability.

Calcare il cemento è un legante formato dalla miscela di materiali naturali, principalmente calcare macinato e acqua, ottenendo un materiale di grande consistenza e durevolezza.

.

Llimestone cement is a binder formed by the mixture of natural materials, mainly ground limestone and water, resulting in a material of great consistency and durability.

Materiale antibatterico, appositamente elaborato per inibire e prevenire le cariche batteriche, grazie all'incorporazione di agenti microbici permanenti statici, con un'efficacia di almeno il 99% contro la contaminazione batterica.

.

Antibacterial material, specially processed to inhibit and prevent bacterial loads, thanks to the incorporation of static permanent microbial agents, with an effectiveness of at least 99% against bacterial contamination.

Bamboo

La pianta di bambù naturale si caratterizza per la sua grande resistenza, flessibilità e, soprattutto, per la sua rapida crescita e rigenerazione, una caratteristica che la rende un materiale sostenibile e un'ottima alternativa all'uso del legno tradizionale, con molte applicazioni. È naturalmente resistente ai parassiti, quindi non ha bisogno di pesticidi.

.

The natural bamboo plant is characterised by its great resistance, flexibility and above all, by its rapid growth and regeneration, a characteristic that makes it a sustainable material and an excellent alternative to the use of traditional wood, with a multitude of applications. It is naturally resistant to plagues, so it does not require the use of pesticides.

Cork

Il sughero è considerato un isolante eccellente e flessibile che si rigenera naturalmente attorno al tronco degli alberi da cui viene estratto, principalmente dalla quercia da sughero e dalla quercia. I processi di estrazione del sughero hanno un impatto minimo sull'ambiente, distinguendosi anche come uno dei materiali organici più durevoli e resistenti.

.

Cork is considered an excellent insulator, flexible, which regenerates naturally around the trunk of the trees from which it is extracted, mainly from the oak tree. The processes of cork extraction have a minimum impact on the environment, also standing out for being one of the most durable and resistant organic materials.

Bamboo FIBRE

La fibra di bambù è ottenuta dai filamenti organici di questa pianta, caratterizzata dalla sua rapida crescita e dalle sue ampie connotazioni ecologiche. L'inclusione della fibra di bambù in vari composti dà origine a materiali nuovi e resistenti, diventando allo stesso tempo un'alternativa sostenibile alla plastica tradizionale altamente inquinante.

.

Bamboo fibre is obtained from the organic filaments of this plant, characterized by its rapid growth and its wide ecological connotations. The inclusion of bamboo fiber (FIBRE) in various compounds creates new and resistant materials, becoming a sustainable alternative to the traditional highly polluting plastics.

Wheat STRAW

La paglia di frumento è prodotta con rifiuti organici provenienti dai resti delle colture di questo cereale. Attraverso il suo riutilizzo, contribuisce alla riduzione dell'uso della plastica in modo notevole, dando vita a composti durevoli, versatili e resistenti, che possono essere applicati nell'elaborazione di innumerevoli prodotti

.

.

Wheat straw is obtained from organic waste of the remains of the wheat harvest. Through its reuse, it contributes to the reduction of the use of plastics in a remarkable way, resulting in durable, versatile and resistant compounds, which can be applied in the elaboration of infinite products.

NATURAL HEMP

Did you know that hemp fibre has anti-bacterial properties, a very high resistance to mould and mildew and eliminates unpleasant odours?
Due to its antimicrobial property, hemp is much stronger and durable than most natural textile fibres.

¿Sabías que la fibra de cañamo posee propiedades anti-bacterianas, una muy alta resistencia al moho y elimina los malos olores?.
Debido a su propiedad antimicrobiana, el cáñamo es mucho más fuerte y duradero que la mayoría de las fibras textiles naturales.

FELT RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

Organic cotton, the cotton of our ancestors, grown using sustainable methods with low impact on the environment. The non-use of insecticides, fertilizers or other chemicals in the yarn and production processes results in a comfortable fabric, 100% plant-derived and hypoallergenic, in a natural weave that claims traditional agriculture.

Algodón orgánico, el algodón de nuestros ancestros, cultivado usando métodos sostenibles con impacto bajo para el medio ambiente. La no utilización de insecticidas, fertilizantes u otros productos químicos en el proceso de hilado y producción da como resultado un tejido cómodo, 100% derivado de plantas e hipoalergénico, de alta sostenibilidad en la cadena de suministro.

RECYCLED COTTON

Global Recycled Standard

Cotton waste from manufacturing processes, together with that from products that have reached the end of their lifespan, takes on a new life. A question arises: Does cotton recovery result in a quality fabric? The answer is YES, preserving natural resources and reducing the amount of waste generated. In addition, regenerated cotton keeps the properties of soft touch.

Los restos de algodón de los procesos de fabricación, junto con los de productos que han llegado al final de su vida útil, cobran una nueva vida. Surge una pregunta: ¿el resultado de la recuperación del algodón da como resultado un tejido de calidad? La respuesta es Sí, conservando recursos naturales y reduciendo la cantidad de residuos generados. Además, el algodón regenerado mantiene las propiedades de suavidad al tacto.

Rpet

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

100% recycled and recyclable material

RECYCLED COTTON

Cotton waste from manufacturing processes, together with that from products that have reached the end of their lifespan, takes on a new life. A question arises: Does cotton recovery result in a quality fabric? The answer is YES, preserving natural resources and reducing the amount of waste generated. In addition, regenerated cotton keeps the properties of soft touch.

Los restos de algodón de los procesos de fabricación, junto con los de productos que han llegado al final de su vida útil, cobran una nueva vida. Surge una pregunta: ¿el resultado de la recuperación del algodón da como resultado un tejido de calidad? La respuesta es SÍ, conservando recursos naturales y reduciendo la cantidad de residuos generados. Además, el algodón regenerado mantiene las propiedades de suavidad al tacto.

FAIRTRADE

Comercio Justo

The future is fair

In questa nuova collezione, abbiamo lavorato per far sì che i nostri articoli vadano oltre e includano valori come la corresponsabilità e la consapevolezza ambientale, al fine di portare un mondo di esperienze e sensazioni attraverso qualcosa di così bello come un regalo.

Fairtrade è un'organizzazione che promuove il commercio equo e solidale in un sistema commerciale alternativo e solidale per perseguire lo sviluppo dei popoli e la lotta alla povertà.Il commercio equo e solidale è una visione commerciale che combatte la povertà, il cambiamento climatico, la disuguaglianza di genere e l'ingiustizia.

Fairtrade mira a sostenere le persone che sono svantaggiate nel commercio internazionale, specialmente i piccoli produttori e i lavoratori dei paesi in via di sviluppo. Così facendo, permette ai produttori e ai lavoratori di avere più controllo sulle loro vite e di decidere come investire nel loro futuro.

Fairtrade lavora su diversi aspetti per raggiungere questo obiettivo:

* **Economico.** Fissano un prezzo minimo del prodotto che gli consenta di coprire i costi di produzione e di vivere in modo equo, permettendo ai lavoratori di avere condizioni di lavoro adeguate insieme a contratti stabili che per dar loro sicurezza. Lavorano con un bonus economico che gli permette di crescere e di investire in progetti di loro scelta.

* **Sociale.** Lottano per la proibizione del lavoro minorile, per condizioni di lavoro decenti e per una reale uguaglianza.

* **Ambientale.** Contribuiscono alla protezione del nostro ambiente, favorendo la biodiversità, la gestione sostenibile dell'acqua e la lotta contro il cambiamento climatico.

Pertanto, essendo consapevoli del grande lavoro che svolge Fairtrade, abbiamo deciso di lavorare con prodotti di cotone Fairtrade, garantendo condizioni di lavoro eque in tutte le fasi della catena di produzione tessile, dal seme di cotone al capo finito.

For this new range, we have worked hard to ensure that our products go further and meet social and environmentally conscious values, with the aim of creating a world of experiences and emotions through something as beautiful as a gift.

Fairtrade is an organisation promoting fair trade through a united and alternative commercial process targeted at improving people's lives and fighting poverty. Fair trade is a vision which combats poverty, climate change, gender discrimination and injustice.

Fairtrade's objective is to support disadvantaged people in international trade, especially small producers and workers in developing countries. It allows producers and workers to have more control over their lives and to decide how to invest in their future.

To achieve this, Fairtrade works in various aspects:

***Economic.** Establishing a minimum price for a product which covers production costs, promotes fair living and enables workers to operate under the correct conditions with stable contracts which give them security. This helps them work in an economic environment which allows them to improve and invest in projects of their choice.

***Social.** Fighting to achieve the abolition of child labour, guaranteeing proper working conditions, equality and the empowerment of women and children.

***Environmental.** Contributing to the protection of our surroundings, promoting biodiversity, sustainable water management and the fight against climate change.

With this in mind and being conscious of the significant work that Fairtrade carries out, we decided to work with Fairtrade cotton products, guaranteeing fair working conditions throughout all the phases of textile production, from the cotton seed to the end product.

The Fairtrade Cotton label guarantees that the product comes from a traceable and sustainable sourcing chain and helps us to identify garments where 100% of the composition is traceable Fairtrade cotton. All of the cotton is Fairtrade certified, traded, audited and sourced from Fairtrade producers.
Visit www.info.fairtrade.net

El sello Fairtrade Cotton nos garantiza que el producto proviene de una cadena de aprovisionamiento de compra trazable y sostenible y nos ayuda a identificar las prendas en las que el 100% de su composición es algodón Fairtrade trazable. Todo el algodón es certificado Fairtrade, comercializado, auditado y proviende de productos Fairtrade.

Eternal Writing

The tip of these pencils is made of a metal alloy which, when rubbed against paper, breaks down the metal molecules and turns them into an indelible line similar to that of a pencil.
As it does not use ink or pencil lead, it never runs out, so you can use it for a lifetime.

La punta de estos lápices está hecha de una aleación de metales que al roce con el papel descompone las moléculas de metal convirtiéndolas en un trazo indeleble similar al del lápiz .
Como no usa tinta ni mina de lápiz no se acaba nunca y así lo podrás usar toda la vida.

HELPI

ZERO WASTE

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

ANTIBACTERIAL FORMULA

Antibacterial material specially processed to inhibit and prevent bacterial growth, due to the incorporation of permanent static microbial agents, which are highly effective in the control against bacterial contamination.

Material antibacteriano, especialmente procesado para inhibir y prevenir las cargas bacterianas, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad contra la contaminación bacteriana.

RPET

The fabric used in the manufacturing process of this item is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

ANTIBACTERIAL FORMULA

Antibacterial material specially processed to inhibit and prevent bacterial growth, due to the incorporation of permanent static microbial agents, which are highly effective in the control against bacterial contamination.

Material antibacteriano, especialmente procesado para inhibir y prevenir las cargas bacterianas, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad contra la contaminación bacteriana.

Recycled Cardboard

The remains of paper from the manufacturing processes, together with the paper that has reached the end of its lifespan, become an ecological and sustainable material. During the paper recycling process, the amount of virgin fibres used is drastically reduced, contributing to the conservation of forests. In addition, the amount of energy used in the process of recycled paper is considerably reduced, compared to the energy required for the production of traditional white paper.

Los restos de papel de los procesos de fabricación, junto al papel que ha llegado al final de su vida útil, se convierten en un lienzo ecológico y sostenible. Durante el proceso de reciclado del papel, la cantidad de fibras vírgenes utilizada se reduce drásticamente, contribuyendo así a la conservación de los bosques. Por otra parte, la cantidad de energía utilizada en el proceso de fabricación del papel reciclado se reduce considerablemente, en comparación con la energía necesaria para la elaboración del papel blanco tradicional.

RPET

= ZERO WASTE

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

Special laser engraving white light logo

This item with an illuminated interior has an external coating specially designed for laser engraving, with which you will see your advertising or brand illuminated with white light. Ideal for pad printing too.

Este artículo con interior iluminado tienen un recubrimiento exterior especialmente diseñado para grabado láser, con el que conseguirá que su publicidad o marca quede originalmente iluminada con luz blanca. Ideales para tampografía también.

RECYCLED COTTON

Cotton waste from manufacturing processes, together with that from products that have reached the end of their lifespan, takes on a new life. A question arises: Does cotton recovery result in a quality fabric? The answer is YES, preserving natural resources and reducing the amount of waste generated. In addition, regenerated cotton keeps the properties of soft touch.

Los restos de algodón de los procesos de fabricación, junto con los de productos que han llegado al final de su vida útil, cobran una nueva vida. Surge una pregunta: ¿el resultado de la recuperación del algodón da como resultado un tejido de calidad? La respuesta es SÍ, conservando recursos naturales y reduciendo la cantidad de residuos generados. Además, el algodón regenerado mantiene las propiedades de suavidad al tacto.

ZERO WASTE

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

Rpet ZERO WASTE

The fabric used in the manufacturing process of these products is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

Recycled Cardboard

The remains of paper from the manufacturing processes, together with the paper that has reached the end of its lifespan, become an ecological and sustainable material. During the paper recycling process, the amount of virgin fibres used is drastically reduced, contributing to the conservation of forests. In addition, the amount of energy used in the process of recycled paper is considerably reduced, compared to the energy required for the production of traditional white paper.

Los restos de papel de los procesos de fabricación, junto al papel que ha llegado al final de su vida útil, se convierten en un lienzo ecológico y sostenible. Durante el proceso de reciclado del papel, la cantidad de fibras vírgenes utilizada se reduce drásticamente, contribuyendo así a la conservación de los bosques. Por otra parte, la cantidad de energía utilizada en el proceso de fabricación del papel reciclado se reduce considerablemente, en comparación con la energía necesaria para la elaboración del papel blanco tradicional.

Natural CORK

Cork is a material with unique innate characteristics: resistant and light, thermal and acoustic insulation, impermeable to liquids, elastic and compressible, fireproof and hypoallergenic.

But above all, cork is a 100% natural, renewable and biodegradable material. All this makes cork an incomparable material.

.

El corcho es un material con unas características innatas únicas: resistente y ligero, aislante térmico y acústico, impermeable a líquidos, elástico y compresible, ignífugo e hipoalergénico.

Pero sobre todo, el corcho es un material 100% natural, renovable y biodegradable. Todo ello hace del corcho un material inigualable.

RECYCLED COTTON

Cotton waste from manufacturing processes, together with that from products that have reached the end of their lifespan, takes on a new life. A question arises: Does cotton recovery result in a quality fabric? The answer is YES, preserving natural resources and reducing the amount of waste generated. In addition, regenerated cotton keeps the properties of soft touch.

Los restos de algodón de los procesos de fabricación, junto con los de productos que han llegado al final de su vida útil, cobran una nueva vida. Surge una pregunta: ¿el resultado de la recuperación del algodón da como resultado un tejido de calidad? La respuesta es SÍ, conservando recursos naturales y reduciendo la cantidad de residuos generados. Además, el algodón regenerado mantiene las propiedades de suavidad al tacto.

RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

Antibacterial material specially processed to inhibit and prevent bacterial growth, due to the incorporation of permanent static microbial agents, which are highly effective in the control against bacterial contamination.

Material antibacteriano, especialmente procesado para inhibir y prevenir las cargas bacterianas, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad contra la contaminación bacteriana.

RPET

Its use helps to reduce the carbon footprint (C02 emissions to the atmosphere)

.

Su uso contribuye a la reducción de la huella de carbono (emisiones de C02 a la atmósfera)

The fabric used in the manufacturing process of this item is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of this item is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RECYCLED COTTON

Da
3'45€

04

Global Recycled Standard

Cotton waste from manufacturing processes, together with that from products that have reached the end of their lifespan, takes on a new life. A question arises: Does cotton recovery result in a quality fabric? The answer is YES, preserving natural resources and reducing the amount of waste generated. In addition, regenerated cotton keeps the properties of soft touch.

Los restos de algodón de los procesos de fabricación, junto con los de productos que han llegado al final de su vida útil, cobran una nueva vida. Surge una pregunta: ¿el resultado de la recuperación del algodón da como resultado un tejido de calidad? La respuesta es SÍ, conservando recursos naturales y reduciendo la cantidad de residuos generados. Además, el algodón regenerado mantiene las propiedades de suavidad al tacto.

RPET

100% recycled and recyclable material
.
Material de origen 100% reciclado y reciclable

The fabric used in the manufacturing process of this cap is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de esta gorra está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

= = ZERO WASTE

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

ORGANIC COTTON

Organic cotton, the cotton of our ancestors, grown using sustainable methods with low impact on the environment. The non-use of insecticides, fertilizers or other chemicals in the yarn and production processes results in a comfortable fabric, 100% plant-derived and hypoallergenic, in a natural weave that claims traditional agriculture.

Algodón orgánico, el algodón de nuestros ancestros, cultivado usando métodos sostenibles con impacto bajo para el medio ambiente. La no utilización de insecticidas, fertilizantes u otros productos químicos en el proceso de hilado y producción da como resultado un tejido cómodo, 100% derivado de plantas e hipoalergénico, de alta sostenibilidad en la cadena de suministro.

Did you know that the use of organic cotton can reduce the environmental footprint by using up to 88% less water and 62% less energy?

.

¿Sabias que el uso de algodón orgánico puede reducir la huella ambiental al usar hasta un 88% menos de agua y un 62% menos de energía?

100% Technical RPET Fabric

ECO textile

RPET

= = ZERO WASTE

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.
